

ASHOK HELAN BRIJESH

ML Engineer | Generative AI Engineer

Kanyakumari, Tamil Nadu | ahbrijesh2004@gmail.com | [LinkedIn](#) | [GitHub](#) | +91 63846 65931

PROFILE SUMMARY

ML/GenAI Engineer with 2+ years of hands-on experience building and deploying LLM, RAG, and AI agent systems. Experienced in LLM fine-tuning with LoRA/QLoRA and Unsloth, inference optimization with vLLM and llama.cpp, and production-oriented AI workflows using LangChain, LangGraph, MCP, and vector search.

TECHNICAL SKILLS

LLM: PEFT, LoRA, QLoRA, Unsloth, Transformers, HuggingFace, Weights & Biases,

AI Agents & RAG: LangGraph, RAG, Ollama

ML: Python, TensorFlow, Keras, PyTorch, scikit-learn, CNN, RNN, LSTM, NLP

Deployment: vLLM, llama.cpp, FastAPI, REST APIs, Docker, Kafka

Data: NumPy, Pandas, MySQL

ML Evaluation: BLEU, ROUGE, Perplexity

EXPERIENCE

Python Trainee Software Engineer — Worktial | February 2026 – August 2026

Legal LLM:

- Collected Indian legal datasets for domain-specific LLM fine-tuning
- Fine-tuned LLMs using QLoRA, and Unsloth for legal-domain adaptation by tracking the convergence in Weights & Biases.

Multilingual LLM:

- Fine-tuned LLMs for Tanglish, Hinglish, Teluglish, and Manglish conversations.
- Deployed optimized multilingual models using vLLM for scalable, low-latency inference.

CDP Multi-Agent System:

- Engineered MAS workflows to unify customer data into Customer 360° profiles.
- Analyzed behavioral patterns to generate context-aware, meaningful customer responses.

AI Intern — IPCS Global Solutions Pvt. Ltd. | November 2025 – January 2026

Machine Learning:

- Implemented and evaluated 8+ machine learning algorithms for prediction tasks.
- Built classification models achieving accuracy of up to 75%.

Deep Learning:

- Developed 15+ deep learning models using CNN, RNN, and LSTM.
- Optimized models for predictive tasks, achieving accuracy of up to 85%.

Audit Automation & Analyst — Aamin Data Solutions | May 2025 – October 2025

KNIME & Audit Automation:

- Designed 10+ KNIME workflows for audit checks and anomaly detection.
- Obtained a KNIME L3 license and automated 12+ audit processes, reducing manual effort.

LLM Audit Assistant:

- Built an LLM chatbot supporting auditors with audit-related queries.
- Enabled relevant information retrieval and anomaly identification during audit cycles.

AI/ML Intern — AICTE | August 2024 – November 2024

Computer Vision & Attendance System:

- Developed a CNN-based facial recognition model for automated attendance tracking.
- Deployed the trained model to production for real-time attendance recording reducing the manual entry efforts by 90%.

SAP ABAP Intern — Ford Motor Company | June 2024 – August 2024

SAP Data Migration & ABAP Development:

- Supported SAP ERP migration using ABAP OOP, BDC, LSMW, LTMC.
- Enhanced RICEF objects and BAPI processes for efficient data migration achieving 100% precision.

PROJECTS

- **Fine-Tuned Personal Assistant LLM:** Fine-tuned LLMs with LoRA/QLoRA, quantized to GGUF, and deployed via llama.cpp.
- **Audit RAG System:** Built a secure RAG pipeline using LangChain, FAISS, and Ollama for offline audit querying.
- **Suicide Prevention Chatbot:** Fine-tuned DialoGPT for supportive conversations and deployed a stateless Flask-React chatbot.

CERTIFICATION

- **Deep Learning using TensorFlow — IBM**
- **Accelerated Deep Learning with GPU — IBM**

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering

Rajiv Gandhi College of Engineering

CGPA: 8.2 | Graduation Year: 2025
